(703) 850-6946 | Charlottesville, VA | kean.thurman.harrison@gmail.com | www.linkedin.com/in/keanh | <https://kean-harrison-portfolio.vercel.app/>

EDUCATION & TECHNICAL SKILLS

University of Virginia

Bachelor of Arts: *Cognitive Science (Computer Science)* | Minor: *Data Science and Engineering Business*

May 2027

Charlottesville, VA

- **Relevant coursework:** *Software Development, HCI, Python for Machine Learning, Data Structures & Algorithms, Product Management.*
- **Languages & Frameworks:** Python, SQL, JavaScript, TypeScript, React.
- **Developer Tools:** Cursor, Claude Code, GitHub, Figma, Jira, MCP

WORK EXPERIENCE

Booz Allen Hamilton

Product Engineer Intern

Jun – Aug 2026

San Diego, CA

- Built the full frontend for LUMA, a decision-support software platform for DoW clients, in React and TypeScript, integrating MCP workflows across 1,000+ data points to simulate federated analysis for Navy stakeholders.
- Authored LUMA's product requirements document, designed Figma wireframes, and translated user research into feature requirements.
- Conducted discovery sessions with Navy stakeholders and presented LUMA to Booz Allen's C-suite at the Summer Games Challenge Cup.

UVA Darden School of Business

Co-Founder & CTO

Nov 2025 – Jun 2026

Remote

- Co-founded Vantage, an AI-powered fintech savings autopilot selected for the Darden iLab Accelerator; conducted 30 discovery interviews and built a Python savings simulation pipeline to validate the core hypothesis, pivoting after findings fell short of viability threshold.
- Co-founded Speak, an at-home pet health startup midway through iLab; engineered the mobile-first MVP in Next.js 14, React, TypeScript, and Vercel, and designed a health interpretation pipeline using change value thresholds to generate compliance-safe screening insights.
- Presented Speak to investors and stakeholders at Demo Night, communicating product vision, market validation, and technical architecture.

Anthropic

Product Ambassador

Aug – Dec 2025

Charlottesville, VA

- Selected competitively to represent Anthropic at UVA; drove 300+ user signups through product demos, tabling, and direct outreach.
- Organized and led the [Claude for Good Hackathon](#) with Anthropic and McIntire School of Commerce, a one-day event where 175+ attendees across 45 teams built AI tools to improve education at UVA.

Stealth Startup

Technical Product Manager Intern

Jul – Sep 2025

Remote

- Researched and implemented a retrieval-augmented generation (RAG) pipeline to address long-term context retention, grounding the LLM responses in persisted user data and improving response relevance by 70% and accuracy by 58%.
- Evaluated vector retrieval strategies and latency tradeoffs to optimize retrieval performance for founder decision-support workflows.

Johnson Controls International

Sales Engineer Intern

May – Aug 2025

Remote

- Drove 37% conversion rate increase and \$7k+ pipeline growth by analyzing 4,000 customer data points to identify key drop-off drivers.
- Ranked top-performing sales intern; performed additional data analysis beyond core sales responsibilities.

Beats by Dre

Product Analyst

Mar – May 2025

Remote

- Analyzed 4,945 reviews across 54 competitor products to surface Gen Z feature gaps, tradeoffs, and a \$360B+ buying power opportunity, informing a new all-in-one speaker concept for Beats.
- Delivered PRD and final product recommendation to Lead PMs; incorporated value, design, and durability insights in an 8-week contract.

KeanFit LLC

Founder

Aug 2023 – Mar 2025

Alexandria, VA

- Identified an affordability gap between personal training demand and access while working as a certified personal trainer at a local gym; built a market analysis report on underserved demand, then founded KeanFit LLC as a mobile personal training service to fill it.
- Sourced all 9 Q1 clients via self-constructed website, LinkedIn, and direct outreach, delivering personalized fitness and nutrition plans that improved health outcomes 27% per program tracking data.

PROJECTS & INTERESTS

[Technē Strategy Group](#) (UVA)

Tech Lead

Jan – May 2026

Charlottesville, VA

- Delivered go/no-go LLM procurement recommendations for U.S. public-sector Oracle deployment by designing a 24-task benchmark dataset (measuring agentic and reasoning capabilities for defense use-cases) evaluating OpenAI, Gemini, and Grok on OCI.
- Scoped and led a 5-person engagement across an 80-day timeline, delivering final artifacts and presentation to Oracle on schedule.

Infino

Lead Developer

Nov 2025 – Jan 2026

Remote

- Developed Infino, a gamified business learning web app targeting college students; ran 15 discovery interviews and collected 38 survey responses, determining that students lack structured, career-relevant business knowledge, and feel behind peers in interviews and class.
- Built an MVP in Next.js and Supabase using Claude Code and Cursor, delivering a comprehensive and user-friendly experience.
